

# A Chair for Goldilocks Engineering Challenge

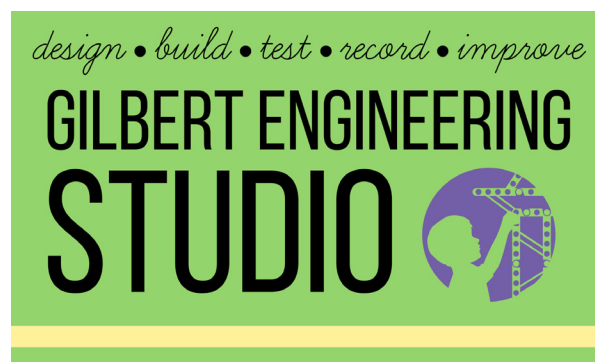

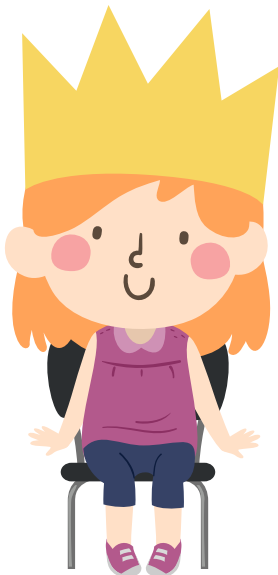

Goldilocks never found a chair that fit her at the bears' house! Help her build a chair that fits her just right.

Choose your favorite stuffed animal or doll to be Goldilocks.

Gather building supplies that are the right size for Goldilocks' chair. (You could use craft sticks, recycled cereal boxes, paper towel tubes, rolled up newspaper, LEGO, books, or whatever else your parents/guardians say is okay.)

Build a chair that is just the right size and strong enough to hold Goldilocks.
