

Rolled Paper Flowers

SUPPLIES:

- Green paper
- Colorful paper for flowers
- Glue
- Tape
- Scissors

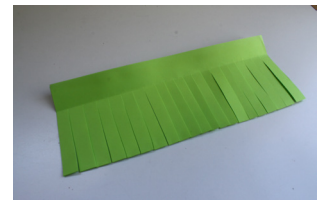

Fold the green piece of paper in half lengthwise (hotdog style) and glue the long edge together.

Cut the folded side into slits about a half inch wide. Leave about an inch at the bottom intact.

Roll up the green paper and tape the bottom so it stays rolled.

Cut out a variety of flowers in different sizes and colors.

Glue the flowers onto the green stems, putting some low, some high, some buried in the stems, and at the front.
